

10 QUESTIONS TO ASK OF YOUR PLAN

(especially when you're
confident it's ready)

You've worked hard to get here
the logic checks out
goals are clear
everything makes sense

Like it or not
plans fail in our Blind Spot
because of what we never realized
was left out

It's so hard to check our own assumptions
so here are 10 questions
to get you started
read slowly, answer honestly
then decide what still holds

Is the plan solid...
or am I just ignoring
signs it's going
to crash?

Is the need still real...
or am I running on
old thinking?

Is this a real issue...
or just loud right now?

Do people
want this...
or am I doing
it to make myself
feel better?

Am I rocking
the boat...
or just afraid I might?

Is this still the right
thing to do...
or have I come too far
to walk away?

What's the
backup plan...
or am I pretending
I won't need one?

Forget the credit...
will I wear the blame if it
goes belly up?

Where am I
holding back...
just to avoid
upsetting someone?

Have I asked what
people really think...
or just assumed
they're with me?

Like it or not...
we all have **Blind Spots**
we can't see them
we can't see within them

That's what **Reveal** is for
90-minutes of conversation
clarity, direction & momentum
